UTC+3 · Remote / hybrid · Open to relocation
Available for work · Russian: native · English: C1

01 / PROFILE

Building interactive projects since 2017, from concept and semantic BEM markup to complex animations, backend integration and production delivery. Portfolio of 70+ projects spanning campaign websites, games, multimedia stories and corporate portals.

I work spec-first: a detailed written specification, followed by implementation paired with AI agents using Codex, Claude Code and Antigravity. Open to campaign work and opportunities with product teams.

02 / TECH STACK

Frontend: JavaScript / TypeScript · Vue / Nuxt · React / Next · HTML · SCSS · BEM · Pug

Animation and media: GSAP · THREE.js · Canvas · Barba.js · video.js

Tools and CMS: Vite / Webpack / Gulp · PHP · Bitrix CMS · WordPress · Figma

03 / EXPERIENCE

Nine Lines

Frontend Developer · October 2023 - Present

Develop responsive websites, Vue/Nuxt single-page applications and interactive games. Build animations with GSAP and THREE.js, integrate APIs and collaborate with backend developers. Implement analytics and technical SEO, maintain and refactor projects, and define tasks and support junior developers.

Projects for RBC, TASS, X5 / food.ru, Nornickel, Sber, Rosatom, Etalon Group and Praxis.

Whitemark

Developer · November 2017 - December 2020

Built frontends from design mockups, GSAP and THREE.js animations, Vue interfaces and mobile versions of websites. Integrated layouts with Bitrix CMS and APIs, and maintained and extended existing sites. Projects included Glass Decor and HILL8.

04 / EDUCATION

Moscow State Linguistic University

Faculty of English · Translation and Translation Studies
University studies, degree not completed · 2014

Selected Projects

Projects developed as part of the Nine Lines and Whitemark teams

05 / INTERACTIVE PROJECTS AND PORTALS

Best Cashier / X5, food.ru, Pyaterochka

2026 · Nine Lines · Nuxt 4, GSAP

Built the frontend for a cashier training game: a moving conveyor belt, barcode scanning, product weighing and manual code entry. Implemented dialogue scenarios with seven virtual customers, learning modules, sound effects and a leaderboard.

best-cashier.food.ru

Nornickel Careers Portal

2024-2026 · Nine Lines · Vue, GSAP, Barba.js

Built a searchable job catalogue with filtering and sorting, and a map of cities and facilities. Implemented application and resume submission forms with validation and Yandex SmartCaptcha, alongside responsive layouts.

career.nornickel.ru

POWER X TIME / TASS, Rosatom

2024 · Nine Lines · GSAP, Barba.js, Canvas

Built an interactive historical timeline with seamless transitions, scroll animations, cards and lighting effects. Implemented navigation across eras and events, optimized performance and delivered a mobile experience with gesture controls.

tass-power-x-time.linestest.com (staging site)

Vmeste AI / TASS, Potanin Foundation

2026 · Nine Lines · video.js, GSAP, Barba.js, Swiper

Built a multimedia campaign with an HLS video player, clickable timecodes, seamless page transitions and synchronized sliders. Delivered a dedicated tabbed interface for mobile devices.

06 / AWARD-WINNING PROJECTS

Glass Decor

2019 · Whitemark · GSAP, THREE.js, Vue, Bitrix CMS

Built the entire frontend: animations and transitions, a Vue catalogue, Bitrix CMS integration, and dedicated mobile and English versions.

Awards: Awwwards Honorable Mention + Mobile Excellence; CSS Design Awards Special Kudos.

glass-decor.ru

HILL8

2018 · Whitemark · GSAP, Bitrix CMS

Built the frontend for a residential development website: animations and transitions, responsive layouts and Bitrix CMS integration.

Awards: Awwwards Honorable Mention; CSS Design Awards Special Kudos; European Property Awards - Developer Website Europe.
